

Ukraine achieved Europe's largest positive net migration in 2024 (+1M returnees), yet return intent remains conditional on security and economic stability — signalling a narrow but actionable window for structured repatriation programs.

Ukraine achieved Europe's largest positive net migration in 2024 (+1M returnees), yet return intent remains conditional on security and economic stability — signalling a narrow but actionable window for structured repatriation programs.

RETURN

53% of Ukrainian EU Migrants Intend to Return Home

A Gradus survey presented at URC2026 shows 53% of Ukrainian migrants in the EU intend to return. Return decisions are increasingly tied to security conditions and economic opportunity rather than war status alone.

3R: Direct measure of return intent; informs diaspora reactivation strategy timing and incentive design for workforce repatriation programs.

Ukraine Records Europe's Largest Positive Net Migration in 2024

In 2024, over one million people returned to Ukraine, making it Europe's top positive net migration country. Simultaneously, EU policy shifts on refugee protection for military-age men may accelerate further returns.

3R: Confirms return wave is already underway; critical for planning reception capacity, skills reintegration, and labour market absorption.

ICMPD: Ukrainian Labour Integration Ahead of Curve; Mobility Schemes Discussed

ICMPD reports Ukrainian beneficiaries of temporary protection are integrating into EU labour markets faster than previous refugee cohorts. Conferences discussed mobility schemes and pathways for stay or return to match skills gaps.

3R: Skilled Ukrainians abroad are employable assets; mobility schemes can channel talent back to Ukraine or enable circular migration to fill critical skill gaps.

Cedos Guide on Third Places in Cultural Institutions During War

Cedos developed a guide for creating third places in cultural institutions as community anchors during wartime. Such spaces support social cohesion and psychological resilience, key factors in preventing internal displacement and brain drain.

3R: Community infrastructure that makes staying in Ukraine more liveable directly reduces outward migration pressure among skilled residents.

GLOBAL CONTEXT

UNHCR-IOM Joint Border Monitoring: Ukraine Response 2025-2026

UNHCR-IOM operational data portal tracks Ukraine Response 2025-2026 cross-border flows. Report #11 monitors inflows and outflows, providing baseline migration data essential for human capital planning.

3R: Authoritative data source for migration flow benchmarking; supports evidence-based Return, Recruit, Retain policy calibration.

UNHCR / IOM OPERATIONAL DATA PORTAL

IOM Venezuela Earthquake Response: 6.76M Affected

IOM reports up to 6.76 million people affected by Venezuela earthquakes (June 27, 2026). Unrelated to Ukraine directly, but signals IOM resource competition and global displacement context.

3R: Global humanitarian competition for IOM/donor resources may affect funding available for Ukraine human capital and migration programs.

IOM

RBESA Regional Dashboard: Refugees and Returnees in Tanzania/SADC

ReliefWeb dashboard covers refugee and returnee dynamics in the SADC region as of May 2026. Not Ukraine-specific, but offers comparative models for large-scale returnee processing relevant to Ukraine's context.

3R: Comparative returnee management models from SADC can inform Ukraine's reception and reintegration infrastructure planning.
